SKILLS

Technical React · Next.js · TypeScript · Redux · Node.js · LLM Integration · Python/Django · PostgreSQL · Supabase · BigQuery · Elasticsearch · AWS · A/B Testing · Datadog · Vercel · Storybook

Leadership Hiring · Servant Leadership · Cross-functional Alignment · Mentorship · Building Psychological Safety · Decisive Ownership

EXPERIENCE

Engineering Manager - Enterprise, Chatbot, Internal Tools | MagicSchool AI Mar 2026 – Present
AI-native edtech platform · 7M+ educators

- Led launch of a personalized recommendations engine for 7M+ educators, replacing 4 static tool suggestions with 9 subject-ranked ones — 23% CTR and 78% click-to-use conversion among new users.
- Led a multi-phase quality initiative on Raina's clarifying-question behavior and response verbosity, using a dedicated eval harness to validate prompt changes before they shipped.
- Built and applied a cross-platform (Linear/GitHub) engineering activity model to inform EPD squad consolidation following a significant, multi person leadership departure
- Owned technical delivery of Unified Enterprise Tools, consolidating three fragmented admin surfaces (tool access, org tools, district settings) into a single interface.
- Led per-user, per-grade/subject tool access management for MagicStudent — replacing an all-or-nothing access model with granular controls for district admins.
- Build psychological safety and inclusive team culture; servant-leader approach focused on knowing individual strengths and challenging each engineer to grow.

Tech Lead Manager, Staff Engineer - Growth | MagicSchool AI Jul 2025 – Mar 2026

- Shipped Free Tier Generation Limits end-to-end: projected \$150K+ annual savings (~27% LLM cost reduction) and structured upgrade trigger for 5–8% of WAU.
- Delivered Admin Outreach campaign achieving 50% landing page conversion (vs. 10% goal), generating ~\$112K in first product-led pipeline.
- Launched User Referral A/B test across ~56K eligible free users, the squad's first statistically significant growth experiment; provisioned ~300K user trials for a reactivation campaign.
- Implemented Amplitude Experiments + Feature Flags infrastructure end-to-end; shipped org-wide documentation and ran a lunch & learn enabling full EPD-wide adoption.

Tech Lead, Senior Engineer - Enterprise & Integrations | MagicSchool AI Sep 2024 – Jul 2025

- Promoted to Tech Lead within one month; led on-time Back to School delivery with admin tooling, onboarding, and Schoology/Canvas integrations while absorbing added scope mid-project and keeping team morale strong.
- Championed creation of a dedicated Design System team - advocated for the investment, resulting in 3 dedicated engineers and a full initiative to build standardized shared UI components.

Engineering Manager (Hands-On) / Sr Frontend Engineer | HowGood Jul 2022 – Sep 2024
Sustainability data platform (Remote)

- Architected the foundational frontend platform; achieved 25% LCP reduction, 40% bundle size reduction, and 30% cycle time reduction via improved PM/eng feedback loops.
- Led Redux Sagas → RTK migration; increased test coverage 10%+; enforced TDD and pair programming standards; built Sentry-based proactive observability process.

Lead Engineer / Software Engineer | KnowledgeHound Jul 2018 – Jul 2022
Market research SaaS platform (Remote)

- Led cross-functional team to deliver the largest grossing upgrade feature in company history on an enterprise RESTful app; managed architecture across multiple large-scale rewrites.
-

EDUCATION

Cornell University · BS Chemical Engineering · 2004 - 2008
Fullstack Academy · Software Engineering Bootcamp · 2018
